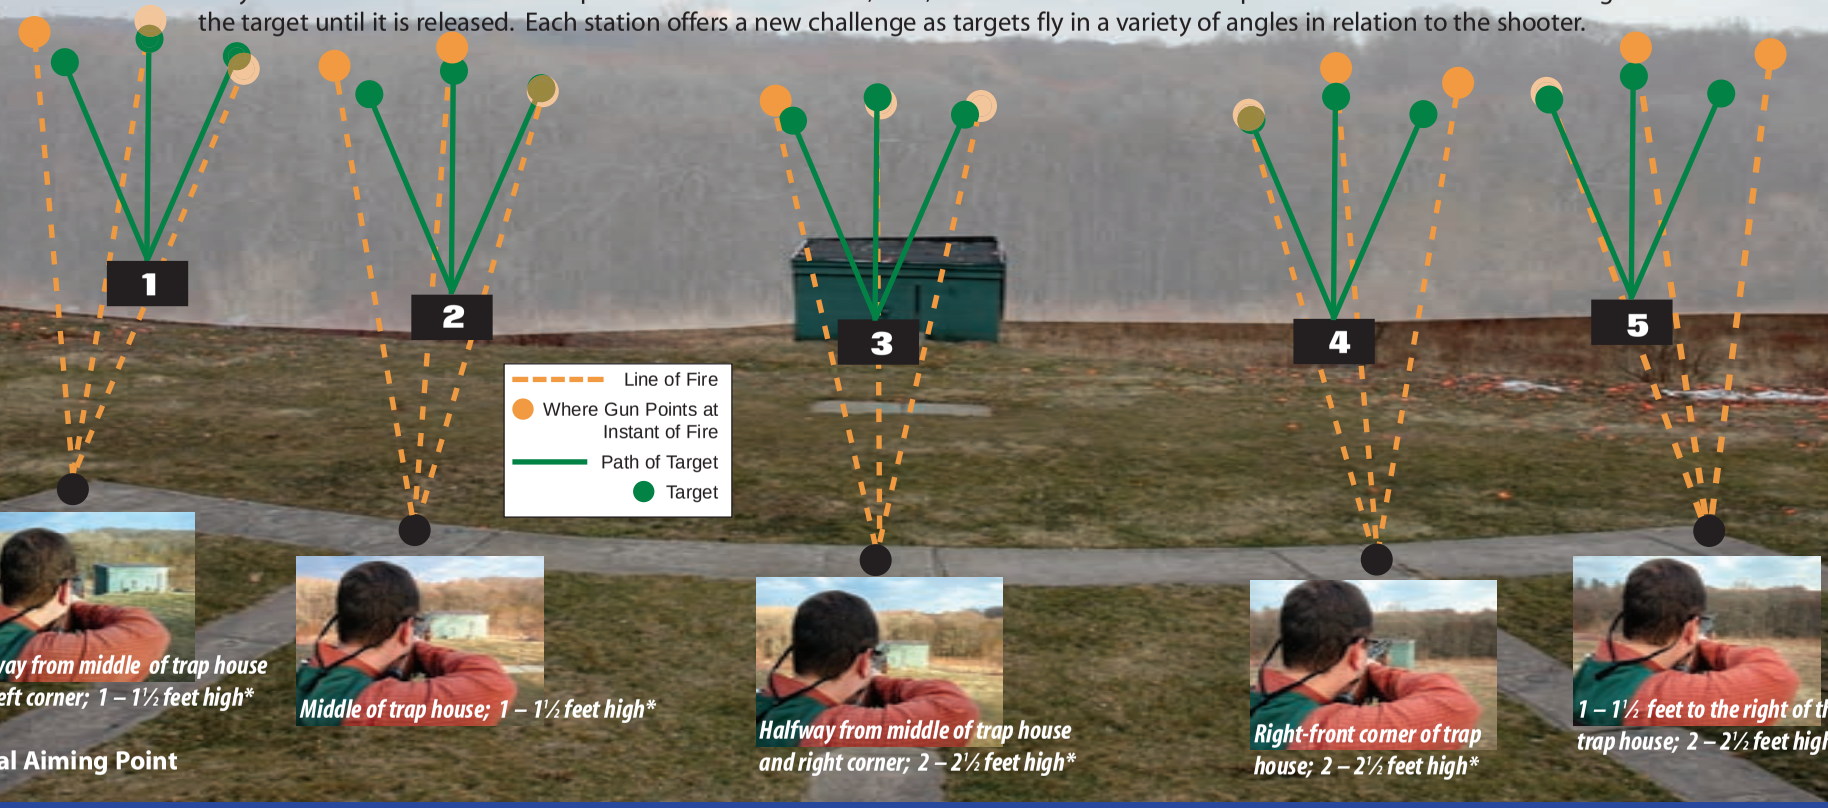
# OFFICIAL 2009 JR. USA TRAP AND SKEET SCORE SHEET

*(make copies as needed)*

**BASIC RULES OF TRAP SHOOTING:**

Squads of up to five individuals shoot single targets from fixed positions (1-5). These positions are called stations and are 3 yards apart. The stations are positioned in an arc behind the trap house, and each individual takes one shot in turn until each shooter has taken five shots. After completing five shots each shooter moves to the next station, and so on, until all positions have been used, for a total of 25 shots per round. Clay disks are thrown from the trap house on the command, "Pull," and travel more than 40 mph. Shooters never know the angle of the target until it is released. Each station offers a new challenge as targets fly in a variety of angles in relation to the shooter.



*Initial Aiming Point
